Professional Summary

AI Engineer with hands-on experience building production-grade LLM systems, including RAG pipelines, NL2SQL assistants, and semantic search platforms. Proven impact in automating workflows and processing large-scale enterprise data (**50M+ records, 100K+ CVs**). Strong in FastAPI, Oracle VECTOR, AI-assisted development workflows, and end-to-end AI system design. Deployed AI systems used in real enterprise environments impacting thousands of users and millions of records.

Experience

AI Software Engineer (Sub Assistant Manager) — MIS

PRAN-RFL Group

Dhaka, Bangladesh

November 2025 – Present

- Built **Uttoron**, a natural-language-to-SQL AI assistant using FastAPI, ChromaDB, and Oracle with LLM-driven query generation and analytics
- Designed schema-aware RAG pipelines enabling real-time SQL execution over **50M+ records**
- Automated MIS reporting workflows, improving data accessibility and decision-making speed
- Developed a full-stack **AI Recruitment Automation system** processing **10,000+ CVs** with semantic job matching
- Built a semantic candidate matching engine using Oracle VECTOR search + MiniLM reranking, improving ranking accuracy
- Designed hybrid scoring (vector + reranker) with explainable 0–100 ranking system
- Built async CV processing pipeline with real-time tracking and job-wise ranking
- Reduced manual screening effort by **60%**
- Engineered **AI agent for Google Meet & Teams**: auto-joins via Playwright, records audio, tracks participants, captures live captions, transcribes with Whisper, generates AI summaries & PDFs.

AI Software Engineer (Intern) — MIS

PRAN-RFL Group

Dhaka, Bangladesh

June 2025 – November 2025

- Contributed to development of an NL→SQL AI assistant by implementing schema-aware query generation and validation, improving query accuracy
- Optimized RAG pipeline performance and assisted in on-premise deployment, enhancing system reliability and reducing report generation time

Full Stack Engineer Intern

Universe IT Institute (UITI)

Dhaka, Bangladesh

December 2024 – May 2025

- Developed AI-powered and full-stack web applications using Python, FastAPI, React, Next.js, Node.js, and PHP
- Built and integrated REST APIs, ML-powered features, and frontend-backend functionalities for scalable web applications

Education

BRAC University, Dhaka

Bachelor of Science in Computer Science and Engineering

July 2020 - January 2025

Projects

PRAN-RFL AI Assistant - Uttoron

Enterprise Internal Project — Demo Available Upon Request

- Built a natural-language-to-SQL AI assistant for enterprise analytics and reporting
- Enabled real-time query generation and insights using LLMs with schema-aware RAG pipelines
- **Tech Stack:** Python, FastAPI, React, ChromaDB, Sentence Transformers, Oracle, LLM APIs (Ollama, OpenRouter)

AI Recruitment Automation - PRAN-RFL Group

Full-Stack AI Recruiting Platform — Demo Available Upon Request

- Developed a full-stack AI platform for CV ingestion, structured extraction, and semantic job matching
- Designed a scalable pipeline for processing PDF/DOCX CVs with optional OCR support
- Implemented semantic search and reranking for candidate-job matching
- **Tech Stack:** Python, FastAPI, React, Sentence Transformers, Oracle VECTOR Search, APScheduler
- **RFL Product Catalog System** rflbd.com/category-8-product 
 - Contributed to product catalog and category management functionalities using Laravel and REST APIs
 - Worked on frontend-backend integration for dynamic product listing and filtering workflows
 - **Tech Stack:** Laravel, PHP, Oracle Database, Next.js, REST APIs

Technical Skills

Languages: Python, TypeScript, JavaScript (ES6+), C/C++, SQL, PHP, C# (basic)

AI & Machine Learning: RAG, Semantic Search, Vector Search, Cross-Encoder Reranking, LLM Integration (Ollama, OpenRouter, Groq), PyTorch, FAISS, Sentence Transformers, OpenCV (Computer Vision)

Frameworks & Libraries: FastAPI, Node.js, Laravel, React, NextJS, Tailwind CSS, Bootstrap, Pydantic, Chart.js

Databases & Infrastructure: Oracle 26ai (VECTOR, BLOB, CLOB), MySQL, SQLite, ChromaDB, Docker, APScheduler

Developer Tools & Concepts: Git, GitHub, REST APIs, Unit Testing (pytest/Jest), Debugging, Code Reviews, OOP, Data Structures & Algorithms, Authentication & Authorization, NL2SQL, Full-Stack AI Development

AI Engineering Workflow: Cursor, Claude, ChatGPT, TRAE AI Agent, Qoder, Prompt Engineering, Context Engineering, LLM Debugging, Agentic Workflows

LeetCode: 500+ problems solved — leetcode.com/u/Ahib_Afnan_Siam

HackerRank: 100+ problems solved — hackerrank.com/ahibafnan99

Achievements & Certifications

- **Top 5 (Worldwide)** in Mission OZ 2022 — Space Teams - [View certificate](#)  2022 - 2023
 - **Winner** of Project Showcasing at Mind Sparks 2023, Ahsanullah University of Science And Technology (AUST)
 - **Certificate of Accomplishment in Software Engineering** October 2024
- HackerRank** — [Credential ID: CF5B58274C39](#) 
- **IELTS Score: 7.5** 5th December 2025
